Coordinated Resource Management (CRM) Training

March 26-27, 2003 – Moses Lake, Washington

ARE YOU TRYING TO START UP A WATERSHED GROUP? DOES YOUR WATERSHED OR RESOURCE MANAGEMENT GROUP NEED TRAINING?

The CRM process has been successfully used in a wide variety of collaborative resource management efforts: Watershed Planning, Wildlife and Grazing, Fisheries, Timber and Riparian Management throughout the U.S. and Canada.

Dennis Phillipi, a nationally recognized and certified CRM consultant, has conducted 75 CRM workshops and he will be the primary instructor for the course. Dennis is the co-author of "Coordinated Resource Management" and he is very familiar with the state of Washington's resource issues, concerns and needs.

In Two Days You Will Learn:

- Why Coordinated-Collaborative efforts are the way to do business
- How to save time, money & man power by working together
- Seven ways of managing conflict
- The importance of group decision making
- The four (4) cardinal rules for successful projects
- How to bring people together for win-win solutions
- Importance of consensus decision making
- How, why and when to use the CRM process

Training Goals

- How to manage conflict through CRM
- Importance of collaboration & coordination
- How to bring people together before conflict
- Importance of shared leadership & decision making
- How CRM can prevent costly appeals and litigation
- Local level Governance
- The importance of facilitation in CRM

Who Will Benefit?

- Private Land Owners
- Community Volunteers and Leaders
- Natural Resource Managers (Public & Private)
- Local, State and Federal Officials
- Environmental Organizations
- Agricultural Organizations
- Private Industry
